

Expense Reimbursement Standard Operating Procedure

1. Scope

This SOP applies to all employees submitting business expense claims for reimbursement, including travel, client meals, and approved software purchases. Claims outside the categories described in this document require prior written approval from a department head.

2. Submission Process

- 1) Collect itemized receipts for every expense over ten dollars.
- 2) Enter each expense in the expense system within fourteen days of the purchase date.
- 3) Attach a scanned or photographed copy of each receipt.
- 4) Submit the claim for manager approval.

Claims submitted more than sixty days after the purchase date will not be reimbursed except in extenuating circumstances approved by Finance.

3. Approved Categories

- Airfare, rail, and ground transportation for approved business travel.
- Reasonable client meal and entertainment expenses.
- Hotel accommodation at standard rate, not luxury tier.
- Software or subscriptions under fifty dollars per month that support the employee's role.

4. Reimbursement Timeline

Approved claims are reimbursed via payroll within two pay cycles of manager approval.

Employees can track claim status in the expense system dashboard at any time and will receive an email notification once a claim has been paid.
