

New Hire Onboarding Guide

1. Welcome

Welcome to the company. This guide walks you through your first two weeks, including account setup, required trainings, and where to find key policies. Please complete each step in order and reach out to your onboarding buddy if anything is unclear.

2. Week One Checklist

- Complete IT account setup and multi-factor authentication enrollment.
- Attend the New Hire Orientation session on your first day.
- Review the Employee Handbook and acknowledge receipt in the HR portal.
- Meet with your manager to set initial 30/60/90 day goals.

3. Required Trainings

All new hires must complete Information Security Awareness training within the first five business days, and Code of Conduct training within the first ten business days. Trainings are assigned automatically in the learning management system and managers receive a notification if a training becomes overdue.

4. Where to Find Policies

The full set of HR policies, including leave, expenses, and remote work guidelines, is available on the internal policy portal. If a policy document conflicts with information in this guide, the policy portal is always the authoritative source.
