

Remote Work Policy

1. Eligibility

Remote work arrangements are available to employees whose role does not require regular on-site presence, subject to manager approval. Eligibility is reviewed annually and may change if role responsibilities change significantly.

2. Core Hours and Availability

Remote employees are expected to be reachable during core hours of 10am to 3pm in their local time zone, and to attend scheduled team meetings with camera on unless otherwise agreed. Extended unavailability during core hours should be communicated to the manager in advance.

3. Equipment and Expenses

The company provides a laptop and standard peripherals for remote employees. A one-time home office stipend of five hundred dollars is available to cover desk, chair, or monitor purchases, claimed through the expense reimbursement process.

4. Security Requirements

Remote employees must use company-managed devices for work, keep operating systems and security patches up to date, and avoid conducting company business over unsecured public Wi-Fi without a VPN connection. Any suspected security incident must be reported to IT Security immediately.
